

MAKSIM PILAT

Frontend Engineer · Angular · React

linkedin.com/in/maksim-pilat | pilatmd@outlook.com | github.com/maxpilat

SUMMARY

3+ years of experience building web, desktop, and mobile applications across fintech, smart infrastructure, and e-commerce.

I take ownership of projects from initial ambiguity to a production-ready system. Comfortable working with stakeholders, quick to pick up new domains, and focused on solving the right problem rather than on the stack.

SKILLS

- **Languages:** TypeScript, JavaScript, Python
- **Frontend:** Angular, NgRx, React, Redux, Next.js
- **Mobile & Desktop:** React Native, Electron
- **Backend & Data:** Node.js, Nest.js, Flask, PostgreSQL
- **Tools:** Git, Docker, Jira

EXPERIENCE

Frontend Engineer · LWO

2024 - 2026 · Minsk, Belarus · Full-time

Built client-side applications for web and desktop. Close collaboration with business analysts, product managers.

Projects:

- **Motorsport** — real-time telemetry system with Angular admin panel + Electron client, offline-first architecture, and robust caching.
- **Fintech** — cross-platform desktop solution for instant card issuance, integrated with banking APIs.
- **Smart Infrastructure** — centralized administration platform for QR-based access control across airport parking, metro, and building security.
- **Corporate Portal** — large-scale internal employee platform: feature development, maintenance, and production support for a high-traffic corporate ecosystem.

Stack: Angular, NgRx, Electron, Nest.js, REST API, WebSocket/SSE.

Full Stack Engineer · Freelance

2023 - 2024

Full Stack development across web and mobile platforms, with experience integrating external systems and building reliable data/transaction flows.

Projects:

- **E-commerce Mobile App** — product catalog, shopping cart, order processing, and social sharing features.
- **B2B Landing Page** — lead generation site for a 1C automation business, integrated with Telegram to capture client requests.
- **B2C EdTech Project** — course sales and material delivery for 3D artist, with payments and CRM integration.

Stack: Next.js, React Native, Flask, PostgreSQL.

EDUCATION

BSc, Artificial Intelligence · BSUIR, Minsk

2021 - 2025

CERTIFICATIONS

- **CEFR B2 English** — International House World Organisation
- **Software Development** — IT STEP Academy

LANGUAGES

Russian — Native · **English** — B2
